GUIDANCE NOTES

NOTE 1	Cost sharing of fences for management will be limited only to that needed to install a sound management system for the unit. Property line fences are not eligible for cost share. Cost share will not be allowed for fences between cropland and grassland. Fences installed to protect stream health will be eligible for cost sharing.
NOTE 2	Applicable only for flow meters, chemigation valves (life span 10yrs.) and concrete turnout structure – small/large (life span 20yrs.).
NOTE 3	No cost-share assistance will be provided for the conversion of rangeland to pastureland when rangeland is in a high-fair or better condition. Fair condition rangeland in a downward trend or with excessive erosion would be allowed.
NOTE 4	Ponds are eligible for cost-share only when required for sound grazing management.
NOTE 5	Cost sharing will not be provided for range seeding where 15 percent desirable grasses are present. Desirable grasses are defined as decreasers and good quality increasers. These climax dominant grasses are listed in the technical range site description.
NOTE 6	Wells are eligible for cost-share only when required to provide livestock water for sound grazing management.
NOTE 7	Well plugging must meet requirements of Water Well Drillers Rules Sections 338.48-338.50 and 338.72.
NOTE 8	Cost-share is limited to poultry incinerators and freezers. Compressor alone may be cost-shared if existing freezer box is in working condition. Applicant must obtain from Texas Commission on Environmental Quality authorization to operate the incinerator prior to payment of cost-share. Incinerators must be placed on concrete slabs.
NOTE 9	Eligible components: Waste transfer pipelines, pumps, sprinklers (including traveling sprinklers) and agitators.
NOTE 10	Eligible components: Dry stack manure storage structures and waste storage ponds (including liners, liner certification, and inlet protection).
NOTE 11	Eligible only when addressing waste management of animal feeding operations.
NOTE 12	Riparian forest buffer and tree/shrub establishment are only eligible for mechanical altered areas and critically eroding areas when trees are the best cover to protect these areas from erosion, reduce runoff, and protect water quality.
NOTE 13	Waste impoundments constructed with Water Quality Management Program cost-share funds are not eligible to be cost-shared for closure unless they have been in place longer than their minimum life span. Waste impoundments constructed under other cost-share programs – ACP, LTA, EQIP, etc. – are not eligible to be cost-shared for closure unless they have been in place longer than their minimum life span or permission to close the structure is granted by the cost sharing entity.
NOTE 14	Riparian Herbaceous Buffer is only eligible for mechanical altered areas and critically eroding areas.
NOTE 15	Only applicable for waste application fields.
NOTE 16	Limited to gutters associated with waste management of animal feeding operations.
