

Local Work Group Meeting

The USDA Natural Resources Conservation Service (NRCS) and the Winter Garden Soil & Water Conservation District #326 are seeking input from the public on how to best serve local agricultural producers through Farm Bill conservation programs and technical assistance.

Local Work Group (LWG) meetings are open to the public and farmers, ranchers, urban ag producers, agribusinesses, elected officials and all are invited to attend.

This meeting is an opportunity to bring farmers, ranchers, conservationists, and others together to discuss natural resources and set local conservation priorities. The information gathered at these listening sessions helps provide NRCS and our District the necessary technical and financial support to help land managers make on-the-ground management decisions that produce positive ecological outcomes at the local and state level.
